LUMINARY Memo #173

To: Distribution
From: D. Densmore
Date: 12 October 1970
Subject: LUMINARY Revision 181

Revision 181 implemented ACB L-34, a minor rearrangement of erasables to take advantage of the new situation after the unreferenced erasables were deleted. (1) Sharing of N90 and N54 was eliminated. (2) DELVOV, now unshared, was moved to share with SERVICER erasables. (3) LRWH1 was moved to share with INCORP rather than P20 (Anomaly L-1D-08). (4) RQVV and R1SAVE (obsolete erasables, not used) were deleted along with obsolete references to them. These changes were to correct problems that created program notes (and in the case of #3 above, an anomaly) and will help avoid future problems.
